

AMENDMENTS TO THE CLAIMS:

Please cancel claims 34 and 35, without prejudice.

This listing of claims will replace all prior versions and listings of claims in the Application:

Claim 1 (currently amended): A laminated electrical device ~~comprised of~~ comprising stacked layers including a substrate, a photovoltaic to produce electricity, a ~~means of~~ device for storing electricity produced by the photovoltaic, a ~~[[means]]~~ source of illumination, electrical circuitry ~~and a means of~~ for electrically connecting the aforesaid electrical components, and a protective surface.

Claim 2 (currently amended): The device as in claim 1 wherein the substrate is rigid.

Claim 3 (currently amended): The device as in claim 1 wherein the substrate is flexible.

Claim 4 (currently amended): The device as in claim 1 ~~wherein~~ further comprising an adhesive and a removable covering for the adhesive ~~[[is]]~~ applied to ~~[[a]]~~ said protective surface or substrate.

Claim 5 (currently amended): The device as in claim 1 ~~wherein~~ further comprising an alternative electrical power inlet and outlet connection point ~~is provided that is~~ in electrical connection with said electrical circuitry.

Claim 6 (currently amended): The device as in claim 1 ~~wherein~~ further comprising a thermally conductive layer in contact with said electric components or layers to dissipate heat from said electric components ~~is provided~~.

Claim 7 (currently amended): The device as in claim 1 ~~wherein~~ further comprising one or more sensor switches in electrical connection with said electrical circuitry ~~turn activation for~~ turning one or more of said electrical components on and off according to conditions or signal.

Claim 8 (currently amended): The device as in claim 1 ~~wherein~~ further comprising one or more controllers in electrical connection to said electrical components ~~[[and]]~~ or circuitry to control ~~location,~~ activation ~~[[and]]~~ and/or duration of ~~sensors,~~ illumination ~~[[or]]~~ and/or signal.

Claim 9 (currently amended): The device as in claim 8 ~~wherein~~ further comprising one or more sensors ~~[[are]]~~ in electrical connection to said electrical circuitry to provide sensor feedback to the controller.

Claim 10 (currently amended): The device as in claim 1 ~~wherein~~ further comprising one or more signal transmitters and receivers ~~[[are]]~~ in electrical connection to said electrical circuitry.

Claim 11 (currently amended): The device as in claim 1 wherein said electrical circuitry prevents electric current drain through said photovoltaic.

Claim 12 (currently amended): The device as in claim 1 wherein said ~~the means of electrical storage is~~ device for storing electricity comprises one or more capacitors.

Claim 13 (currently amended): The device as in claim 1 wherein said ~~the means of electrical storage is~~ device comprises one or more batteries or fuel cells.

Claim 14 (currently amended): The device as in claim 1 wherein one or more of ~~[[the]]~~ said ~~electrically-conductive~~ electrical component layers are transparent.

Claim 15 (currently amended): The device as in claim 1 wherein one or more of ~~[[the]]~~ said ~~non-electrically-conductive~~ electrical component layers are transparent.

Claim 16 (currently amended): The device as in claim 1 ~~wherein~~ further comprising one or more ~~[[of the]]~~ transparent adhesive layers ~~are transparent~~.

Claim 17 (currently amended): The device as in claim 1 wherein the ~~[[means]]~~ source of illumination ~~[[is]]~~ emits light in the visible light spectrum, non-visible spectrum or combination of both.

Claim 18 (currently amended): The device as in claim 17 wherein the [[means]] source of illumination [[is]] comprises one or more light emitting diodes.

Claim 19 (currently amended): The device as in claim 17 wherein the [[means]] source of illumination [[is]] comprises one or more organic light emitting devices.

Claim 20 (currently amended): The device as in claim 17 wherein the [[means]] source of illumination [[is]] comprises one or more electroluminescent materials.

Claim 21 (currently amended): The device as in claim 17 wherein the [[means]] source of illumination [[is]] comprises one or more illuminating chips, ~~Illumination Chip refers to Laser,~~
~~Photonics~~ preferably a laser, photonic, LED or other miniature light emitting source.

Claim 22 (currently amended): The device as in claim 1 ~~wherein~~ further comprising one or more layers of light refractive materials ~~are used~~.

Claim 23 (currently amended): The device as in claim 1 ~~wherein~~ further comprising one or more layers of light reflective materials ~~are used~~.

Claim 24 (currently amended): The device as in claim 23 wherein the light reflective material is oriented to reflect in one or more directions.

Claim 25 (currently amended): The device as in claim 1 ~~wherein~~ further comprising one or more layers of fluorescent materials ~~are used~~.

Claim 26 (currently amended): The device as in claim 1 ~~wherein~~ further comprising one or more layers of luminescent materials ~~are used~~.

Claim 27 (currently amended): The device as in claim 1 ~~wherein~~ further comprising one or more layers of dielectric materials ~~are used~~.

Claim 28 (currently amended): The device as [[n]] in claim 1 wherein [[the]] an exterior surface of the device is smooth.

Claim 29 (currently amended): The device as in claim 1 wherein ~~[[the]]~~ an exterior surface of the device is textured.

Claim 30 (currently amended): The device as in claim 1 wherein one or more ~~of the laminated layers~~ electrical components are combined ~~[[into]]~~ in a single layer.

Claim 31 (currently amended): The device as in claim 1 ~~wherein~~ comprising a plurality of layers or multiple devices ~~[[are]]~~ assembled edge to edge.

Claim 32 (currently amended): The device as in claim 1 ~~wherein~~ comprising a plurality of layers or multiple devices ~~[[are]]~~ laminated edge to edge.

Claim 33 (currently amended): The device as in claim 1 ~~wherein~~ comprising a plurality of devices ~~[[are]]~~ in electrical, ~~Illumination~~ illumination or signal connection.

Claim 34 (canceled).

Claim 35 (canceled).
